HERB FED

For A Bird With Taste

Because our poultry has had time to grow slowly, reaching maturity naturally, the taste and texture has had time to develop further.

The fresh herbs we introduce really enhance the natural flavour of the meat giving it a greater depth and unique taste. Our chickens are truly free to roam outside and make use of their natural instincts; being able to peck at the grass, find and eat insects, dust bathe and soak up the sunshine.... Or the rain! They live in mobile huts in small flock sizes, are hand-fed and bedded up daily with fresh straw.

Fresh herbs are put in custom made miniature hay racks in the bird's fields where they are free to peck away at them at their will. All the herbs are a by-product of Herbs Unlimited and are either trimmings or herbs that have simply gone past their best and would otherwise end up on a compost heap.

Pecking through the herbs keeps the birds occupied and stimulated resulting in happy and extremely healthy birds. Furthermore, the herbs provide additional nutrients to their diet on top of the additive free cereal based feed they get from a local mill.

By using this waste, Herb Fed is not only contributing to our bird's quality of life, but doing so in a way which is sustainable and environmentally friendly.

Caffe Eto Fairtrade Arabica Coffee Beans

The cedar bouquet combines subtly, mingling gracefully, with floral-spicy scents. The roast produces a toasty, almost pepper-like punch which is flattering to this single origin Arabica. Good body with an earthy mouthfeel this coffee, when combined with steamed and texturised milk provides a memorable taste experience. When brewed to Gold Cup Standards, the fragrant coffee provides a robust clean profile.

Caffe Eto coffee beans are hand roasted in Italy to a traditional recipe and brought to you exclusively by Castell Howell.

NATASHA'S LAW COMES INTO EFFECT 1ST OCTOBER 2021

ARE YOU READY?

What is Natasha's Law?

As of 1st October 2021, any business based in England must clearly label all foods prepared and packed on their premises. The purpose of this new legislation is to give allergenic ingredients more prominence on product labels in order to protect hypersensitive consumers and give them greater confidence in the food they buy, following the tragic death of Natasha Ednan-Laperouse in 2016.

All pre-packed for direct sale foods will now need to have labels showing:

- The name of the foods
- A full ingredients list with the 14 allergens required to be declared by food law emphasised on the ingredients list if present.

Celery

Crustaceans

Egg

Fish

Lupin

Milk

Molluscs

Mustard

Peanuts

Sesame

Soya

Sulphur Dioxide

Treenut

Amber

Over 170 foods can cause allergic reactions according to statistics on food allergies.

(Research Gate)

The number of adult patients admitted to hospital because of allergies has more than doubled since 2013, reaching a record high of 27,172 in 2019/2020.

(Anaphylaxis.org.uk)

Anaphylaxis-type reactions occur in around one in 1,000 people worldwide.

(Allergy UK) (Mayo Clinic)
